

Product Backlog Evidence

Campus Food Ordering Platform

Software Design Project 2026

27	4	100%	GitHub Projects
Backlog items	Sprints covered	Items marked Done	Evidence source

This document summarises the prioritised product backlog for the Campus Food Ordering Platform. It records the main features, enhancements, and fixes planned throughout the project and shows how the backlog items were managed across Sprint 1, Sprint 2, Sprint 3, and Sprint 4.

Items were managed using GitHub Issues and GitHub Projects. Each backlog item is listed with its priority, user story or purpose, main sprint, and final status.

1. GitHub Projects Evidence

The product backlog and sprint task boards were tracked using GitHub Projects. These boards provide evidence that backlog items were organised and monitored during development.

Main GitHub Projects page: <https://github.com/Raquel9988?tab=projects>

Sprint	GitHub Project Board
Sprint 1	https://github.com/users/Raquel9988/projects/2
Sprint 2	https://github.com/users/Raquel9988/projects/4
Sprint 3	https://github.com/users/Raquel9988/projects/6
Sprint 4	https://github.com/users/Raquel9988/projects/7

2. Product Backlog Table

The table below lists the prioritised product backlog. The Status column shows that each item was completed by the final submission stage.

Priority	Backlog Item	User Story / Purpose	Main Sprint	Status
High	Student authentication	As a student, I want to sign up and log in so that I can access the food ordering platform.	Sprint 1	Done
High	Vendor authentication	As a vendor, I want to register and log in so that I can manage my food business on the platform.	Sprint 1	Done
High	Admin authentication and role-based access	As an admin, I want protected admin access so that only authorised users can manage the system.	Sprint 1	Done

Priority	Backlog Item	User Story / Purpose	Main Sprint	Status
High	Vendor approval and suspension	As an admin, I want to approve or suspend vendor accounts so that only valid vendors can use the platform.	Sprint 1	Done
High	Menu item creation and editing	As a vendor, I want to add and edit menu items so that students can view my available food.	Sprint 1	Done
High	Menu display and availability	As a student, I want to view menu items and availability so that I know what food can be ordered.	Sprint 1	Done
High	Cart functionality	As a student, I want to add menu items to a cart so that I can prepare my order before checkout.	Sprint 2	Done
High	Place order functionality	As a student, I want to place an order so that vendors can prepare my food.	Sprint 2	Done
High	Orders database and backend logic	As the system, I want to store orders and order items so that order information is saved and retrievable.	Sprint 2	Done
High	Vendor orders dashboard	As a vendor, I want to view incoming orders so that I can prepare customer orders.	Sprint 2	Done
High	Order status management	As a vendor, I want to update order status so that students can track order progress.	Sprint 2	Done
Medium	Student order tracking	As a student, I want to view my orders so that I can track my purchases and order status.	Sprint 2	Done
Medium	Real-time updates and notifications	As a student or vendor, I want order updates to appear live so that I do not need to refresh manually.	Sprint 2	Done
High	Online payment API	As the system, I want to connect to PayFast so that student payments can be processed securely.	Sprint 3	Done
High	Order and payment linking	As the system, I want to link payments to orders so that only paid orders are processed.	Sprint 3	Done
High	Payment UI	As a student, I want a payment interface so that I can complete checkout.	Sprint 3	Done
High	One-vendor cart rule	As a student, I want to order from one vendor at a time so that payment and order tracking stays simple.	Sprint 3	Done
Medium	Active orders and order history	As a student, I want active and completed orders separated so that I can track current and past orders clearly.	Sprint 3	Done
Medium	Dietary tag selection for vendors	As a vendor, I want to assign dietary tags to menu items so that items are properly classified.	Sprint 3	Done
Medium	Dietary backend storage	As the system, I want to store dietary data so that it can be used for filtering.	Sprint 3	Done
Medium	Dietary filtering for students	As a student, I want to filter menu items by dietary needs so that I can find suitable food.	Sprint 3	Done
Medium	Analytics backend/data preparation	As an admin, I want clean analytics data so that reports show correct sales and order information.	Sprint 4	Done
Medium	Analytics dashboard layout	As an admin, I want one clear analytics dashboard so that I can view all reports in one place.	Sprint 4	Done
Medium	Sales per vendor report	As an admin, I want to view sales per vendor over time so that I can understand vendor performance.	Sprint 4	Done
Medium	Peak ordering hours report	As an admin, I want to see peak ordering hours so that I can understand when students order most.	Sprint 4	Done
Medium	Custom analytics view	As an admin, I want filtered analytics views so that I can analyse specific data.	Sprint 4	Done
Medium	Export reports	As an admin, I want to export reports as CSV or PDF so that I can save or share analytics results.	Sprint 4	Done

3. Sprint-Level Backlog Summary

Sprint	Main Focus	Backlog Items	Priority Mix	Final Status
Sprint 1	Authentication, role-based access, menu foundation, and admin controls.	6	6 High	Done
Sprint 2	Ordering workflow, cart, order status updates, and student/vendor order tracking.	7	5 High, 2 Medium	Done
Sprint 3	Online payments, paid-order logic, one-vendor cart rule, and dietary features.	8	4 High, 4 Medium	Done
Sprint 4	Admin analytics, sales/peak-hours/custom reports, export functionality, and final submission preparation.	6	6 Medium	Done

4. Evidence Used

The product backlog items were based on the team's GitHub Projects boards, GitHub Issues, sprint planning documents, and sprint task allocation documents.

• GitHub Projects overview page	• Sprint 2 Task Allocation Tables
• Sprint 1 GitHub Project board	• Sprint 2 User Stories / Issues
• Sprint 2 GitHub Project board	• Sprint 2 Team Meeting Summary
• Sprint 3 GitHub Project board	• Sprint 3 Meetings
• Sprint 4 GitHub Project board	• Sprint 3 Task Breakdown
• Sprint 1 Group Guide	• Updated Sprint 3 User Stories and Tasks

• Sprint 1 Meeting Discussions	• Sprint 4 Goal Task Breakdown
--------------------------------	--------------------------------

5. Final Note

This document can be submitted as product backlog evidence. It provides a clean summary of the prioritised backlog, shows how the backlog was split across the four sprints, and references the GitHub Project boards where the work was tracked.
